

purpose

Female Wave of Change is a global movement that unites women changing the world into a better place. We are women from all walks of life who take responsibility for our own future, the future of the next generation and of the world.

Female Wave of Change offers women a safe place where they can be their authentic selves, be economically empowered and grow into the change-makers who shape the world.

Together they actively create a more sustainable world based on more human values, on compassion, on collaboration and abundance: a world that celebrates diversity and creates equal opportunities for everyone.

GLOBAL GOALS

Female Wave of Change takes responsibility for a better future by embracing the Global Goals for Sustainable Development as set by 193 world leaders in September 2015. If these goals are completed it would mean an end to extreme poverty, inequality and climate change by 2030.
